Corporate Profile

 Freezer System Co., Ltd.

## Greetings

Freezer System Co., Ltd. was honorably established back in April 2001. We have been originally based on the two different companies and their wonderful corporate histories, reliable technologies, business achievements and commercial trust & reliabilities: One is an over-50-year-old Freezer & Heater maker for foods, and another one is an over-30-years old manufacturer (of Hitachi Group) of panels for prefabricated buildings. Now we proudly develop our business operations mainly in the fields of Freezers, Prefabrication, Building & Construction, and Environmental Protection. We also put weight on the development of eco-friendly products for contributing to the world. With our business motto of "Let's Supply Good Quality Products at Reasonable Prices," we are committed to serving the diversifying needs.

President  
Chikahito Matsusita

## Business Management Principles

We aim to contribute greatly to our society by 1) supplying a wide range of products that shall satisfy our customers' needs, 2) assuring the quality and reliability of our products and services (including the production of freezing/heating systems, panels for prefabricated buildings and their related business work, and the designing and construction of food factories / distribution warehouses) and 3) strictly complying with laws and regulations.
